

The personal experience of "The Gorilla" himself is quite impressive. This master investor behind GorillaTrades maintains a network of financial insiders gathered throughout his 25 years in the industry. He recognized a phenomenon when he determined that subtle indicators preceded explosive individual stock price movements. It was as a result of this research that he developed his proprietary formula using 14 different technical indicators, and used the signals generated by his system to turn \$250,000 into \$5,500,000 in the 18 months prior to founding GorillaTrades!

# I'm a GorillaTrades Believer and you'll be too!

DAVY JONES, former member of "The Monkees" and entertainer extraordinaire, doesn't monkey around when it comes to investing. He is so confident in the Gorilla's advice that he has decided to join our team to help spread the word about GorillaTrades' proven, amazing service.

GorillaTrades is a risk-controlled, market-tested, proprietary system, which generates a menu of stock ideas that time and time again identifies stock trades with explosive price appreciation potential! Make no mistake, the GorillaTrades system is not about day trading. In fact, the average holding period for GorillaPicks is from a few weeks to several months with a goal of double-digit profits from every position recommended. Moreover, each idea presented contains only one-half to one-third the risk compared to its potential return. A simple Risk Rating is included with every GorillaPick that defines its probable risk.

For the skeptic, this site offers free 30-day access to what may be the most profitable, risk-controlled investment service you'll ever find.

## HOW EXACTLY DOES THE GORILLATRADES SYSTEM WORK?

GorillaTrades uses its specialized proprietary computer software program to analyze over 6,000 stocks from the three major markets each day after the close. Using an intricate formula, it calculates the strength of 14 different technical indicators and analyzes their potential risk and upside probability parameters. The software program then projects specific upside price (profit) targets and generates an appropriate stop loss level for every GorillaPick recommended. These stocks then have to exceed specific price and volume levels to officially enter the Gorilla's list of stocks that are preparing to explode in price in one direction (GorillaPicks) or the other (GorillaShorts). This is literally like finding needles in a haystack with a computer-guided magnet! Additionally, the Gorilla raises stop loss levels along the way in order to protect his subscribers' hard-earned profits. The Gorilla "holds your hand" the entire way! This enables you to decrease your research time and improve your portfolio's return; whether the market goes up, down, or sideways. This takes the hardest part of investing off your hands.

It's no coincidence that a rapidly growing number of subscribers to the GorillaTrades service are stock brokers and professional money managers! Is it necessary to be available during trading hours to use the GorillaTrades system? Absolutely not! Within a couple of hours of the markets' close each evening, the Gorilla sends his subscribers a detailed perspective of the market to help them make sense of that day's activity, and more importantly, gives them insight to help them profit from what some of Wall Street's top traders are expecting from tomorrow's market. He then provides specific recommendations for purchase at the next morning's open.

# PROFIT WITH THE PROS

## GorillaTrades...The Secret to Serious Stock Picks.

**GORILLA TRADES, INC.** GorillaTrades is a risk-controlled, market-tested, proprietary system, which generates a menu of stock ideas that time and time again identifies stock trades with explosive price appreciation potential! Make no mistake, the GorillaTrades system is not about day trading. In fact, the average holding period for GorillaPicks is from a few weeks to several months with a goal of double-digit profits from every position recommended. For the skeptic, this site offers free 30-day access to what may be the most profitable, risk-controlled investment service you'll ever find.

Since it is quite possible that the stock market could remain in a paralyzing trading range over the next several years, you need a proven service like GorillaTrades to provide you with an excellent source of high-probability trading ideas! If you're like most of our subscribers, you are probably tired of unrealistic services that claim to produce only winners and no losers. Investors are too intelligent to believe such ridiculous claims. Most of these services consistently recommend the most volatile stocks, which are unsuitable in certain market environments. The Gorilla believes in staying fully diversified, and provides risk parameters to enhance and educate subscribers in their trading decisions. As with any system of investing, there will be losses. However, the losses are less than 6% on average, while most profits are three, four, five, or even six times this figure! Folks, if you take a minute to do the math you will quickly realize just how fast your money could grow!

This is not a service that pulls stocks out of a hat, but rather a program that educates its subscribers with valuable information. The Gorilla does not recommend high-flying internet or tech stocks that have the same probability of falling as they do rising. The GorillaTrades system not only looks for quick gains, but it recognizes companies that have constructive, long-term technical patterns. Burlington Northern, for example, was held for over a year before it finally breached its stop loss level. Because its stop

loss level was continuously raised on a weekly basis, even though it stopped out, it still generated more than a 50% profit! TXU Corp., a utility company which also offers an attractive dividend, netted GorillaTrades' subscribers a whopping 47% profit in just 3 months! Urban Outfitters, a retailer, was traded three different times, each time for a profit, while the stop loss level was raised to minimize risk. In fact, the final trade of URBN netted subscribers a 42% profit!
