

SPECIAL OPPORTUNITY FOR **INVESTOR'S BUSINESS DAILY**® READERS

# Is this you?

**CHOOSING STOCKS DOESN'T  
HAVE TO BE A CRAP SHOOT.**

**Profit with the Pros**

## Dear Investor's Business Daily Reader,

If you are one of the many investors whose portfolio suffered major losses in the crash of 2000, and you have been searching for an effective way to invest for quick profits, let us introduce you to GorillaTrades, and its market-tested method that provides realistic results. Compound growth is a wonderful thing for the patient investor: 15% profits this year, 10% the next, maybe even 25% the year after. Continue at that rate for a while, and you've built-up quite a nest egg for yourself!

But sometimes, that's just not good enough! Sometimes it seems as if time is not your friend, and you feel like you need to earn 15% THIS WEEK... or 25% THIS MONTH...

It's at times like those that you need a market-tested stock picking service like GorillaTrades.

You see, the GorillaTrades system is a stunningly simple, proprietary system that time and again has identified stock trades with EXPLOSIVE short-term potential. Don't worry, GorillaTrades is not about day-trading. In fact, the average GorillaTrades holding period is between a few weeks and a few months, with a goal of double-digit profits from every position recommended. Are you tired of the unrealistic services that claim to produce all winners and no losers? Investors are too intelligent to believe such ridiculous claims. As with any system of investing, there are always losses. However, the losses, on average, are less than 7%, while most profits are two, three, or even four times this figure! Folks, if you take a minute to do the math, you will quickly realize just how fast your money could grow. The Gorilla "holds your hand," the entire way by not only providing stop loss levels, but he also provides upside (profit) targets on EVERY GorillaPick he recommends. Additionally, the Gorilla raises stop loss levels along the way in order to protect his subscribers' hard-earned profits.

Within a couple of hours of the markets' close each evening, The Gorilla sends his subscribers a detailed wrap-up to help them make sense of that day's activity...and more importantly... give them insight to help them make money off of what some of Wall Street's top traders are expecting from TOMORROW's market.

He then provides specific recommendations for purchase at the next morning's open. In fact, there are three different categories of recommendations given:

**1. GORILLA PICKS**—stock trades identified by a proprietary technical analysis system designed for short-term (a few weeks to a few months is the targeted holding period) double-digit capital appreciation. Here are just some of the stocks that have been BOUGHT and SOLD for double-digit profits already THIS year: Atheros Communications (ATHR), VCA Antech (WOOF), Century Aluminum (CENX), Arris Group (ARRS), Gilead Sciences (GILD), Qiagen (QGEN), Southwest Gas (SWX), and Verigy (VRGY).

**2. GORILLA SHORTS**—proprietary stock picks with a high likelihood of falling 20% to 40% or more in the next few weeks, allowing you to make big, quick money on the downside. Big GorillaShort winners recommended in the GorillaTrades daily updates for quick 20% profits each were: CNET Networks (CNET) in just 4 weeks and Blockbuster (BBI) in less than 6 weeks!

**3. SPECIAL SITUATION PICKS**—these picks are meant to have longer term holding periods (several months in most cases). Special Situation Picks appear less often, but when they do appear, these stocks are usually among the most explosive of the Gorilla's recommendations. They include recent winners like: SYSTEMS XCELLENCE (SXC), which was recommended on April 13, and is already up more than 44%! Bolt Technology (BTJ), recommended on November 29, and has rocketed 199% since! Terra Industries (TRA) is up an incredible 307% since its recommendation July 27, 2006! Are these big, fast winners hiding lots of losers? Not a chance!

**GorillaTrades is a technical, systematic approach to identifying stock trades with EXPLOSIVE short term potential. Every night the GorillaTrades system sifts through over 6,000 stocks, ranking them on 14 different indicators.**

**THE GORILLA ON PROFIT:** The personal experience of "The Gorilla" himself is quite impressive. This master investor behind GorillaTrades maintains a network of financial insiders gathered throughout his 25 years in the industry. He recognized a phenomenon when he determined that subtle indicators preceded explosive individual stock price movements. It was as a result of this research that he developed his proprietary formula using 14 different technical indicators, and used the signals generated by his system to turn \$250,000 into \$5,500,000 in the 18 months prior to founding GorillaTrades!

## A Great Opportunity... for Some People

"The first thing I do in the morning is log onto the Gorilla...unless my husband has beaten me to it! This picture was taken...with much help from Mr. Gorilla... on the Queen Mary II heading for the Caribbean."

CLAIRE AND MIKE SCHMIDT, Subscribers  
for over three years, CARMEL, IN

"Last month I took you up on your trial offer. I 'paper-traded' your confirmed picks for a while and then, seeing positive results, made a couple trades. I must confess that I validated (for my peace of mind) your picks for their IBD numbers and how they were ranked in a couple of other well-known ranking services found on the internet. To make a long story short, my trial is over today and I'm looking forward to a very rewarding year: the trades on your recommended stocks have already paid for my yearly subscription."

DAVE PALMER, Subscriber for almost a year, HIGGANUM, CT

"As a GorillaTrades subscriber since early 2000, I have seen up markets, and down markets, but have more than paid for my annual subscription every single month! I find it amusing that my stockbroker now calls me daily, and treats me like a peer. I have learned so much from the Gorilla. Thank you for such a wonderful service!"

BRUCE LIEBOWITZ, Subscriber for over seven years,  
Farmington Hills, Michigan.

**PLEASE NOTE:** The GorillaTrades service is **NOT** for everyone. However, some individuals are seasoned investors who like to (or need to) use a portion of their portfolio to manage more aggressively and actively.

If you fall into that category, and can honestly answer yes to the following three questions, then GorillaTrades may be a great service for you:

**1. Are you willing to trade a segment of your portfolio every day?** This is not a buy-and-hold service. As the examples given above show, many round-trip trades may run only a few weeks, and if you miss a week or two, big profits can quickly turn into big losses.

**2. Are you comfortable with the tax implications and trading costs associated with active trading?** While this is NOT day-trading, the implications of trading in and out of positions every few weeks are significant. Ideally, for the long picks, you would utilize the GorillaTrades system in a tax-deferred account, so that a lot of your profits aren't eaten up by short-term capital gains taxes. At the very least, you'll want to do your trading at a deep-discount broker, keeping your transaction costs in check.

**3. Do you have daily e-mail access?** As mentioned previously, these trades move extremely fast. E-mail is the only efficient way for The Gorilla to get in touch with you if he has urgent trading instructions. (It is NOT necessary to be available during trading hours!) There is absolutely NO reason whatsoever to "watch" the stock market during trading hours using the Gorilla Trades system.
