

Profit with the Pros

The Secret to Serious Stock Picks

GorillaTrades is a risk controlled, market-tested, proprietary system, which generates a menu of stock ideas that time and time again identifies stock trades with explosive price appreciation potential! Make no mistake, the GorillaTrades system is not about day trading. In fact, the average holding period for GorillaPicks is from a few weeks to several months with a goal of double-digit profits from every position recommended. Moreover, each idea presented contains only one-half to one-third the risk compared to its potential return. A simple Risk Rating is included with every GorillaPick that defines its probable risk.

For the skeptic, this site offers free 30-day access to what may be the most profitable, risk-controlled investment service you'll ever find.

This is not a service that pulls stocks out of a hat, but rather a program that educates its subscribers with valuable information. As with any system of investing, there will be losses. However, the losses are less than 6% on average, while most profits are three, four, five, or even six times this figure! Folks, if you take a minute to do the math you will quickly realize just how fast your money could grow!

How exactly does the GorillaTrades system work?

GorillaTrades uses its specialized proprietary computer software program to analyze over 6,000 stocks from the three major markets each day after the close. Using an intricate formula, it calculates the strength of 14 different technical indicators and analyzes their potential risk and upside probability parameters. The software program then projects specific upside price (profit) targets and generates an appropriate stop loss level for every GorillaPick recommended.

GorillaTrades then continues to actively track these stocks, regularly raising stop loss levels and second targets as needed. This guidance helps subscribers lock in profits and minimize any losses enabling you to decrease your research time and improve your portfolio's return; whether the market goes up, down, or sideways. This takes the hardest part of investing off your hands. It's no coincidence that a rapidly growing number of subscribers to the GorillaTrades service are stock brokers and professional money managers!

The beauty of GorillaTrades is that it's simple, yet highly effective. The system allows you to invest on a level playing field with professionals, without the research time. There is a good reason why GorillaTrades has subscribers in 55 different countries, and has become one of the fastest growing, most highly respected investing systems in the world. Now is the time to take your portfolio to the next level!

If you're completely thrilled with your profits, do nothing and your service will continue at a special introductory rate of only \$599.95 for the ENTIRE year (which many subscribers say they make back in their first few Gorilla trades)! However, if you decide this service is not for you, simply call us or cancel online at any time within the first 30 days, and your credit card will never be charged! **GUARANTEED.**

PROFILE: THE GORILLA

The personal experience of "The Gorilla" himself is quite impressive. This master investor behind GorillaTrades maintains a network of financial insiders gathered throughout his 25 years in the industry. He recognized a phenomenon when he determined that subtle indicators preceded explosive individual stock price movements. It was as a result of this research that he developed his proprietary formula using 14 different technical indicators, and used the signals generated by his system to turn \$250,000 into \$5,500,000 in the 18 months prior to founding GorillaTrades!"

"I am a long-time stock market investor; subscribing at various times to just about every publication, newspaper, and CD advisor that has been sold. I am impressed with your advice. It is delightful to say that I have made money by listening to you. I compare my experience to listening to Tchaikovsky's 1812 overture. Your site is dynamic, inspiring, intelligent, noisy, rewarding; but beautiful to behold. Keep up the good work!"

"Besides supplying valuable trading ideas, the Gorilla is an educator as well and that is probably more valuable in the long run than the trading ideas. The repetitions of buying into strength rather than weakness, of always assigning an exit strategy to every trade, of balancing risk against potential returns; all these lessons that the Gorilla repeats almost nightly are yielding profits. The most valuable quotation the Gorilla has ever uttered is, "Learn
