PROFILE THE GORILLA

THE GORILLA ON PROFIT: The personal experience of "The Gorilla" himself is quite impressive. This master investor behind GorillaTrades maintains a network of financial insiders gathered throughout his 25 years in the industry. He recognized a phenomenon when he determined that subtle indicators preceded explosive individual stock price movements. It was as a result of this research that he developed his proprietary formula using 14 different technical indicators, and used the signals generated by his system to turn \$250,000 into \$5,500,000 in the 18 months prior to founding GorillaTrades!

PROFIT WITH THE PROS

GorillaTrades... The Secret to Serious Stock Picks.

GORILLATRADES INC.

GorillaTrades is a risk-controlled, market-tested, proprietary system, which generates a menu of stock ideas that time and time again identifies stock trades with explosive price appreciation potential! Make no mistake, the GorillaTrades system is not about day trading. In fact, the average holding period for GorillaPicks is from a few weeks to several months with a goal of double-digit profits from every position recommended. Moreover, each idea presented contains only one-half to one-third the risk compared to its potential return. A simple Risk Rating is included with every GorillaPick that defines its probable risk.

For the skeptic, this site offers free 30-day access to what may be the most profitable, risk-controlled investment service you'll ever find.

Since it is quite possible that the stock market could remain in a paralyzing trading range over the next several years, you need a proven service like GorillaTrades to provide you with an excellent source of high-probability trading ideas! If you're like most of our subscribers, you are probably tired of unrealistic services that claim to produce only winners and no losers. Investors are too intelligent to believe such ridiculous claims. Most of these services consistently recommend the most volatile stocks, which are unsuitable in certain market environments. The Gorilla believes in staying fully diversified, and provides risk parameters to enhance

and educate subscribers in their trading decisions. As with any system of investing, there will be losses. However, the losses are less than 6% on average, while most profits are three, four, five, or even six times this figure! Folks, if you take a minute to do the math you will quickly realize just how fast your money could grow!

This is not a service that pulls stocks out of a hat, but rather a program that educates its subscribers with valuable information. The Gorilla does not recommend high-flying internet or tech stocks that have the same probability of falling as they do rising. The GorillaTrades system not only looks for quick gains, but it recognizes companies that have constructive, long-term technical patterns. Burlington Northern, for example, was held for over a year before it finally breached its stop loss level. Because its stop loss level was continuously raised on a weekly basis, even though it stopped out, it still generated more than a 50% profit! TXU Corp., a utility company which also offers an attractive dividend, netted GorillaTrades' subscribers a whopping 47% profit in just 3 months! Urban Outfitters, a retailer, was traded three different times, each time for a profit,

while the stop loss level was raised to minimize risk. In fact, the final trade of URBN netted subscribers a 42% profit!

How exactly does the Gorilla-Trades system work?
GorillaTrades uses its specialized proprietary computer software program to analyze over 6,000 stocks from the three major markets each day after the close. Using an intricate formula, it calculates the strength of 14 different technical indicators and analyzes their potential risk and upside probability parameters. The software program then projects specific upside price (profit) targets and generates an appropriate stop loss level for every GorillaPick recommended. These stocks then have to exceed specific price and volume levels to officially enter the Gorilla's list of stocks that are preparing to explode in price in one direction (GorillaPicks) or the other (GorillaShorts). This is literally like finding needles in a haystack with a computer-guided magnet! Additionally, the Gorilla raises stop loss levels along the way in order to protect his subscribers' hard-earned profits. The Gorilla "holds your hand" the entire way! This enables you to decrease your research time and improve your portfolio's return; whether the market goes up, down, or sideways. This takes the hardest part of investing off your hands. It's no coincidence that a rapidly growing number of subscribers to the GorillaTrades service are stock brokers and professional money managers!

Is it necessary to be available during trading hours to use the GorillaTrades system?

Absolutely not! Within a couple of hours of the markets' close each evening, the Gorilla sends his subscribers a detailed perspective of the market to help them make sense of that day's activity, and more importantly, gives them insight to help them profit from what some of Wall Street's top traders are expecting from tomorrow's market. He then provides specific recommendations for purchase at the next morning's open.

SUBSCRIBERS TRUE SUCCESSES

Martin B. Soloway is a long-time stock market investor and GorillaTrades subscriber for over 3 years.

"As a GorillaTrades subscriber since early 2000, I have seen up markets, and down markets, but have more than paid for my annual subscription every single month! I find it amusing that my stockbroker now calls me daily, and treats me like a peer. I have learned so much from the Gorilla. Thank you for such a wonderful service!" reports Bruce Liebowitz of Farmington Hills, Michigan.

"I have bought and sold mutual funds since about 1986 and have had decent returns and feel that I understand them pretty well. I never felt that I was knowledgeable or had the time to become knowledgeable enough to buy individual stocks. After reading numerous books regarding investing, and getting a handle on what to look for in a stock, I was left with an empty feeling trying to sift through all the stocks to find those few that had the "right credentials." I find the Gorilla Trades service so valuable because you have solved the trouble of finding those stocks. Because of GorillaTrades I feel equipped with the right stocks to choose from and have made my new adventure into stock trading profitable from the start," reports Brandon Rinehart from Traverse City, Michigan. Brandon has been a GorillaTrades subscriber for almost 3 years.

"I take each and every GorillaPick very seriously and use their price/volume guidelines religiously. Many of their GorillaPicks make you "Big Money" later rather than immediately! Even when the Gorilla is not immediately right, some of their previous picks literally double or triple within 9-12 months," reports Bob Weber of Stockton, California, a subscriber for 2 years.

"I subscribe at various times to just about every publication, newspaper, and CD advisor that has been sold. I am impressed with your advice." says subscriber Martin B. Soloway of Orange, CT.

Eighty-year-old George Nelson has increased his portfolio by 50% in the last two years.

"As an eighty-year-old subscriber, I find your nightly advice not only profitable these last three years – but a boon to keeping the old cranium working. I quit tennis at 75 (my partners were falling by the wayside) and golf two or three times a week is enough. My portfolio is not large by normal standards, but with your guidelines I have increased it by 50% the last two years. I have taken advantage of just about all your puppies with large paws. They never fail to pay for themselves within days if you invest an equal dollar amount in all five," says 4 year subscriber, George Nelson of Burbank, California.

"Last month I took you up on your trial offer. I 'paper-traded' your confirmed picks for a while and then, seeing positive results, made a couple trades.... my trial is over today and I'm looking forward to a very rewarding year: the trades on your recommended stocks have already paid for my yearly subscription," states Dave Palmer of Higganum, CT.

Dave Palmer, a new subscriber from Higganum, CT used the free trial period to 'paper-trade' confirmed picks.

I felt unsure of myself. I too was willing to sell out at the slightest downturn. After time, and your tremendous help, I feel that I have a fairly good grasp of how to continue to make winning trades. Yes, there are occasional screw-ups, but on the whole, I am in positive territory and getting better every day, thanks to you," says Eugene J. Dziekan of Boca Raton, Florida, a subscriber for over a year.
