

# THE SECRET TO . serious stock picks

**GORILLATRADES:** A risk-controlled, market-tested, proprietary system, which generates a menu of stock ideas that time and again identifies stock trades with explosive price appreciation potential!

**GorillaTrades...Silly name, serious stock picks.**

**Make no mistake.** The GorillaTrades system is not about day trading. In fact, the average holding period for GorillaPicks is from a few weeks to several months with a goal of double-digit profits from every position recommended. Moreover, each idea presented contains only one-half to one-third the risk compared to its potential return. A simple Risk Rating is included with every GorillaPick that defines its probable risk. For the skeptic, this site offers free 30-day access to what may be the most profitable, risk-controlled investment service you'll ever find.

### How exactly does the GorillaTrades system work?

GorillaTrades uses its specialized proprietary computer software program to analyze over 6,000 stocks from the three major markets each day after the close. Using an intricate formula, it calculates the strength of 14 different

technical indicators and analyzes their potential risk and upside probability parameters. The software program then projects specific upside price (profit) targets and generates an appropriate stop loss level for every GorillaPick recommended. These stocks then have to exceed specific price and volume levels to officially enter the Gorilla's list of stocks that are preparing to explode in price in one direction (GorillaPicks) or the other (GorillaShorts). This is literally like finding needles in a haystack with a computer-guided magnet! Additionally, the Gorilla raises stop loss levels along the way in order to protect his subscribers' hard-earned profits. The Gorilla "holds your hand" the entire way! This enables you to decrease your research time and improve your portfolio's return; whether the market goes up, down, or sideways. This takes the hardest part of investing off your hands. It's no coincidence that a rapidly growing number of subscribers to the GorillaTrades service are stock brokers and professional money managers!

### Is it necessary to be available during trading hours to use the GorillaTrades system?

Absolutely not! Within a couple of hours of the markets' close each evening, the Gorilla sends his subscribers a detailed perspective of the market to help them make sense of that day's activity, and more importantly, gives them insight to help them profit from what some of Wall Street's top traders are expecting from tomorrow's market. He then provides specific recommendations for purchase at the next morning's open.

### Profit with the Pros.

And, if you're completely thrilled with your profits, do nothing and your service will continue at a special introductory rate of only \$499.95— a FULL \$100 OFF of the current annual subscription rate—for the entire year (which many subscribers say they make back in their first trade or two)! However, if you decide this service is not for you, simply call us or cancel online at any time within the first 30 days, and your credit card will never be charged! Guaranteed!

## Subscriber Successes

**BRUCE LIEBOWITZ**

"As a GorillaTrades subscriber since early 2000, I have seen up markets, and down markets, but have more than paid for my annual subscription every single month! I find it amusing that my stockbroker now calls me daily, and treats me like a peer. I have learned so much from the Gorilla. Thank you for such a wonderful service!"

### THE GORILLA ON PROFIT:

The personal experience of "The Gorilla" himself is quite impressive. This master investor behind GorillaTrades maintains a network of financial insiders gathered throughout his 25 years in the industry. He recognized a phenomenon when he determined that subtle indicators preceded explosive individual stock price movements. It was as a result of this research that he developed his proprietary formula using 14 different technical indicators, and used the signals generated by his system to turn \$250,000 into \$5,500,000 in the 18 months prior to founding GorillaTrades.
