INSIDE THIS ISSUE

The Gorilla on Profit Subscribers Reveal Real Successes Tips to Lock in Profits, Minimize Losses

MAKE NO MISTAKE, the GorillaTrades system is not about day trading. In fact, the average holding period for GorillaPicks is from a few weeks to several months with a goal of double-digit profits from every position recommended. Moreover, each idea presented contains only one-half to one-third the risk compared to its potential return. A simple Risk Rating is included with every GorillaPick that defines its probable risk.

For the skeptic, this site offers free 30-day access to what may be the most profitable, risk-controlled investment service you'll ever find.

Since it is quite possible that the stock market could be relatively flat in 2007, you need a market-tested service like GorillaTrades to provide you with an excellent source of highprobability trading ideas! If you're like most of our subscribers, you are probably tired of unrealistic services that claim to produce only winners and no losers. Investors are too intelligent to believe such ridiculous claims. Most of these services consistently recommend the most volatile stocks, which are unsuitable in certain market environments. The Gorilla believes in staying fully diversified, and provides risk parameters to enhance and educate subscribers in their trading decisions. As with any system of investing, there will be losses. However, the losses are less than 6% on average, while most profits are three, four, five, or even six times this figure! Folks, if you take a minute to do the math you will quickly realize just how fast your money could grow!

This is not a service that pulls stocks out of a hat, but rather a program that educates its subscribers with valuable information. The Gorilla does not recommend high-flying internet or tech stocks that have the same probability of falling as they do rising. The GorillaTrades system not only looks for quick gains, but it recognizes companies that have constructive, long-term technical patterns. Burlington Northern, for example, was held for over a year before it finally breached its stop loss level. Because its stop loss level was continuously raised on a weekly basis, even though it stopped out, it still generated more than a 50% profit! TXU Corp., a utility company which also offers an attractive dividend, netted GorillaTrades' subscribers a whopping 47% profit in just 3 months! Urban Outfitters, a retailer, was traded three different times, each time for a profit, while the stop loss level was raised to minimize risk. In fact, the final trade of URBN netted subscribers a 43% profit!

How exactly does the Gorilla-Trades system work?

GorillaTrades uses its specialized proprietary computer software program to analyze over 6,000 stocks from the three major markets each day after the close. Using an intricate formula, it calculates the strength of 14 different technical indicators and analyzes their potential risk and upside probability parameters. The software program then projects specific upside price (profit) targets and generates an appropriate stop loss level for every GorillaPick recommended. These stocks then have to exceed specific price and volume levels to officially enter the Gorilla's list of stocks that are preparing to explode in price in one direction (GorillaPicks) or the other (GorillaShorts). This is literally like finding needles in a haystack with a computer-guided magnet! Additionally, the Gorilla raises stop loss levels along the way in order to protect his subscribers' hard-earned profits. The Gorilla "holds your hand" the entire way! This enables you to decrease your research time and improve your portfolio's return; whether the market goes up, down, or sideways. This takes the hardest part of investing off your hands. It's no coincidence that a rapidly growing number of subscribers to the GorillaTrades service are stock brokers and professional money managers!

Is it necessary to be available during trading hours to use the GorillaTrades system?

Absolutely not! Within a couple of hours of the markets' close each evening, the Gorilla sends his subscribers a detailed perspective of the market to help them make sense of that day's activity, and more importantly, gives them insight to help them profit from what some of Wall Street's top traders are expecting from tomorrow's market. He then provides specific recommendations for purchase at the next morning's open.

"Last month I took you up on your trial offer. I 'paper-traded' your confirmed picks for a while and then, seeing positive results, made a couple trades. I must confess that I validated (for my peace of mind) your picks for their IBD numbers and how they were ranked in a couple of other well-known ranking services found on the internet. To make a long story short, my trial is over today and I'm looking forward to a very rewarding year: the trades on your recommended stocks have already paid for my yearly subscription.

I think I may reside in your jungle for a long time to come. And one last thing, a couple weeks ago a reader wrote in about buying on the first pullback after the confirmation. Had I chosen that tactic, my return of 43% (I trade options) in 3 weeks would have doubled. Thanks very much. I truly look forward to your emails every time I log on!"

THE GORILLA ON PROFIT

The personal experience of "The Gorilla" himself is quite impressive. This master investor behind GorillaTrades maintains a network of financial insiders gathered throughout his 25 years in the industry. He recognized a phenomenon when he determined that subtle indicators preceded explosive individual stock price movements. It was as a result of this research that he developed his proprietary formula using 14 different technical indicators, and used the signals generated by his system to turn \$250,000 into \$5,500,000 in just 18 months!

While most would expect to pay hundreds of dollars per month for such a service, you will pay nothing for the first 30 days!
