

GorillaTrades Success Story

An investment strategy that actually works!

I first became familiar with GorillaTrades through an advertisement in Investors Business Daily back in 2002. There has just been one year since then that I didn't subscribe to the Gorilla, and that was definitely a mistake on my part.

I started my account in 2002 with \$25,000.00 of what I considered my "play money" I left the majority of my retirement in my 401K in my company's plan. I now have \$153,000.00 in my "play money" account, and I am seriously thinking of managing my entire portfolio with the help of GorillaTrades. I think my success story rocks."

Connie C. Moreno, Willis, VA

Sure, GorillaTrades is a silly name, but when it comes to investing for your retirement, the Gorilla knows it is a very serious matter. So whether you have a 401K, an IRA, or even a "play account," **now is the time for you to see what GorillaTrades' risk-averse investment system can do for you!**

Investing with GorillaTrades is not about swinging for the fences every time, hoping something pays off; instead it is a system based upon **calculated risk**. The Gorilla believes in remaining fully diversified, and provides risk parameters and ratings to enhance and educate subscribers in all trading decisions. So no matter what your financial situation or goals are, **GorillaTrades can help you get where you want to be!**

**Results may vary among subscribers.*
