

THE GORILLA ON PROFIT: The personal experience of "The Gorilla" himself is quite impressive. The master investor behind GorillaTrades maintains a network of financial insiders gathered throughout his 30 years in the industry. He recognized a phenomenon when he determined that subtle indicators preceded explosive individual stock price movements. It was a direct result of this research that he developed his proprietary formula using 14 different technical indicators, and used the signals generated by his system to turn \$250,000 into \$5,500,000 in the 18 months prior to founding GorillaTrades; a fact verified by IBD.

"I like to trade options. There is so much information out there, and so many individuals and groups that try to put themselves between me and the money (creating imaginary toll booths). I follow the Gorilla's Option Idea of the Week. Once I have the data, I make the final decision on the trade and any additional strategies using the Gorillas parameters. I look forward to Monday evenings, and I also eat more bananas." Mark M. Wright, Savannah, GA

"I first became familiar with Gorilla Trades through an advertisement in Investors Business Daily back in 2002. There has just been one year since then that I didn't subscribe to the Gorilla, and that was definitely a mistake on my part. I started my account in 2002 with \$25,000.00 of what I considered my "play money" I left the majority of my retirement in my 401K in my company's plan. I now have \$153,000.00 in my "play money" account, and I am seriously thinking of managing my entire portfolio with the help of Gorilla Trades. I think my success story rocks." Connie C. "The Confirmed Pick realized gains/losses (the good, bad, and ugly) resulted in a 52.36% profit for {Cash On The Table" last year. I will admit my returns from your system (I follow your rules!) was more like 47%. Part of the difference (53% to my 47%) is due to "Trigger Price verse Confirmed Entry Actual" (I buy only Confirmed GorillaPicks), and I tended to sell 100% of my position at 1st target. Thus, I failed to gain on 2nd target advances. I will soon be trading like a Gorilla, while overlooking the Gulf of Mexico (and the 16th green) from the North Shore CC in Corpus Christi, TX every winter from now on once my "don't freeze my butt off" home is complete in June. And YES, a room or two was made possible in part to the "GorillaTrades System!" John A. Droste, Noblesville, IN

"As a GorillaTrades subscriber since early 2000, I have seen up markets, and down markets, but have more than paid for my ANNUAL subscription every single MONTH! I find it amusing that my stockbroker now calls me daily, and treats me like a peer. I have learned so much from the Gorilla. Thank you for such a wonderful service!" GorillaTrades... The Secret to Serious Stock Picks.

GORILLA TRADES, INC. GorillaTrades is a risk-controlled, market-tested, proprietary system, which generates a menu of stock ideas that time and time again identifies stock trades with explosive price appreciation potential! Make no mistake, the GorillaTrades system is not about day trading. In fact, the average holding period for GorillaPicks is from a few weeks to several months with a goal of double-digit or triple-digit profits from every position recommended. Moreover, each idea presented contains only one-half to one-third the risk compared to its potential return. A simple Risk Rating is included with every GorillaPick that defines its probable risk.

For the skeptic, the Gorilla offers free 30-day access to what may be the most profitable, risk-controlled investment service you'll ever find.

Since it is quite possible that the stock market could remain in a volatile trading range over the next several years, you need a proven service like GorillaTrades to provide you with an excellent source of high-probability trading ideas! If you're like most of our subscribers, you are probably tired of unrealistic services that claim to produce only winners and no losers. The Gorilla knows investors are too intelligent to believe such ridiculous claims. Most of these services consistently recommend the most volatile stocks, which are unsuitable in certain market environments. The Gorilla believes in staying fully diversified, and provides risk parameters to enhance and educate subscribers in their trading decisions. As with any system of investing, there will be losses. However, the losses are less than 8% on average, while most profits are three, four, five, or even six times this figure! Folks, if you take a minute to do the math you will quickly realize just how fast your money could grow!

This is not a service that pulls stocks out of a hat, but rather a program that educates its subscribers with valuable information. The Gorilla does not recommend high-flying tech or biotech stocks that have the same probability of falling as they do rising. The GorillaTrades system not only looks for quick gains, but it recognizes companies that have constructive, long-term technical patterns. Advance Auto Parts (AAP), for example, was held for over a year before it finally breached its stop loss level. Because its stop loss level was continuously raised on a weekly basis, even though it stopped out, it still generated more than a 91% profit! SunEdison (SUNE), a semiconductor manufacturer, netted GorillaTrades subscribers a 34% profit in less than 6 months! Valeant Pharmaceuticals (VRX), a drug delivery company, netted GorillaTrades subscribers an impressive 37% profit in just 2 months! These are just a few of the powerful GorillaPicks executed so far this year!

HOW EXACTLY DOES THE GORILLATRADES SYSTEM WORK?

GorillaTrades uses its state-of-the-art, proprietary computer software program to analyze over 6,000 stocks from the three major markets each day after the close. Using an intricate formula, it calculates the strength of 14 different technical indicators and analyzes their potential risk and upside probability parameters. The software program then projects specific upside price (profit) targets and generates an appropriate stop loss level for every GorillaPick recommended. These stocks then have to exceed specific price and volume levels to officially enter the Gorilla's list of stocks that are preparing to explode in price in one direction (GorillaPicks) or the other (GorillaShorts). This is literally like finding needles in a haystack with a computer-guided magnet! Additionally, the Gorilla raises stop loss levels along the way in order to protect his subscribers' hard-earned profits. The Gorilla "holds your hand" the entire way! This enables you to decrease your research time and improve your portfolio's return; whether the market goes up, down, or sideways. This takes the hardest part of investing off your hands. It's no coincidence that a rapidly growing number of subscribers to the GorillaTrades service are stock brokers and professional money managers! Is it necessary to be available during trading hours to use the GorillaTrades system?

Absolutely not! Within a couple of hours of the markets' close each evening, the Gorilla sends his subscribers a detailed perspective of the market to help them make sense of that day's activity, and more importantly, gives them insight to help them profit from what some of Wall Street's top traders are expecting from tomorrow's market. He then provides specific recommendations for purchase at the next morning's open.

LOCK IN PROFITS, MINIMIZE LOSSES

Skechers (SKX)
Trigger: Above \$62.49
First Target: \$68.25
Second Target: \$185
Stop Loss: \$130
Confirmation Volume Area: 920K
Risk Rating: 5

Pictured to the right is a graph of Skechers (SKX), which was recommended to GorillaTrades subscribers on 1/29/15. Both the stop loss and second target were raised weekly to preserve subscribers' gains, as SKX appreciated in the portfolio. SKX finally breached its \$130 raised stop loss level on 8/24/15, for a huge 108% profit in less than 7 months!

Be empowered by the GorillaTrades menu of ideas; fresh stock picks that have flawlessly passed GorillaTrades' intricate 14 step screening process and analytical scrutiny. New GorillaPicks are presented in the Gorilla's nightly newsletter email and on the Subscribers only website, along with specific instructions on where to place trading parameters based on an in-depth technical profile of each stock. Each GorillaPick includes a specific trigger price, confirmation volume level, stop loss level, first target, second target, and even trading tips as well as a company overview.

GorillaTrades is the complete solution for the modern investor by providing fresh stock picks, precise guidelines about how to trade them, daily updates on the current portfolio, a compelling daily market commentary, and educational resources to round out the complete investor.

GorillaTrades then continues to actively track these stocks, regularly updating stop loss levels and second targets as needed. This guidance helps subscribers lock in profits and minimize any losses. The beauty of GorillaTrades is that it's simple, yet highly effective. The system allows you to invest on a level playing field with professionals, without the research time. There is a good reason why GorillaTrades has subscribers in 55 different countries, and has become one of the fastest growing, most highly respected investing systems in the world. Now is the time to take your portfolio to the next level!
